ABSTRAK

***THE DEVELOPMENT OF BERBERSHOP SEARCH APPLICATION IN
BANDAR LAMPUNG *BY USING GEOLOCATION AND JQUERY LETEST
METHOD***

Barbershop is a renownded business. By taking the moment of returning Elvis Presley hairstyle or we can call as shiny or pomade style, the phenomen of barbershop increase very much. It is not only in capital but also in cornered place in severals provinces, there are unique and nice barbershop. The locations spread in the Mall even the shop that has unique characteristics itself.

Creating the barbershop search application by using geolocation and jquery letest method and count the near distance by using A* (A star) method and for the counting of the questioners by using slovin. In this journal the researcher uses ISO 9126 (Al qutaish 2010) that focus on testing interface, using functional aspects and usbality to search barbershop in bandar Lampung.

Keywords *: barbershop, A* (A-Star), slovin, geolocation, jquery letest,* ISO 9126
