

ABSTRACT

The people's welfare, especially in the Pesawaraan area, is processed in the people's welfare section of the Pesawaran district government which has been regulated in Law no. 11 of 2009, concerning Community Welfare, community welfare is a condition of meeting the material, spiritual and social needs of citizens in order to live properly and be able to develop themselves, so that they can carry out their social functions. problems such as the service section on people's welfare does not yet have a platform or media for delivering information on assistance and requests for the community, if there are terms and conditions submitted that are incomplete, so that the process of disbursing grant aid funds is hampered, because they have to wait for the community to come to the office to complete the requirements and create queues.

The purpose is a concept to achieve something desired, the research objectives are to facilitate the process of requesting assistance by the community, facilitate the delivery of information on the results of the application to the applicant and provide services to the People's Welfare section to the community regarding applications for grants. The development process is carried out using a mysql database and dreamweaver tools, a web-based system built with information in the form of applicant identity data, application submissions, application results and sending data on the use of funds to the welfare party.
