

INTISARI

Alghieshoot Photo Studio merupakan salah satu bisnis atau usaha yang bergerak di bidang fotografi. Berdasarkan wawancara yang telah dilakukan, Alghieshoot Photo Studio membutuhkan pengembangan sistem yang mampu membantu proses admistrasi pengolahan pemasukan dan pengeluaran pendapatan yang masih menggunakan cara yang manual yaitu dicatat dalam buku besar sehingga hal ini menyebabkan pembuatan laporan pemasukan dan pengeluaran pendapatan Alghieshoot tidak tepat waktu, karyawan Alghieshoot Photo Studio juga kesulitan merekap data karena jika jumlah transaksi jasa yang terjadi sangat banyak maka jumlah nota akan memiliki jumlah yang banyak pula sehingga harus menyatukan satu persatu berdasarkan hari/tanggal dan jika terjadi hilangnya nota akan membuat kualitas informasi laporan tidak baik dan tidak akurat, dalam melakukan pemesanan jasa fotografi masih manual yaitu pelanggan harus datang ke Alghieshoot Photo Studio, hal ini dirasa peneliti menjadi kesempatan untuk menambahkan *fitur booking* jasa fotografi secara *online* agar membantu dalam proses pemesanan jasa fotografi agar lebih mudah dan efisien. Dari permasalahan diatas peneliti membangun sistem informasi administrasi pelayanan jasa photografi yang membantu proses administrasi pengolahan data pemasukan dan pengeluaran pendapatan sehingga pembuatan laporan pemasukan dan pengeluaran pendapatan Alghieshoot Photo Studio menjadi mudah, tepat waktu dan akurat saat sewaktu-waktu dibutuhkan pimpinan atau pemilik Studio, serta juga membantu Karyawan dalam pengolahan data transaksi jika jumlah transaksi pemesanan jasa yang terjadi sangat banyak pada periode harian, dan tidak memerlukan lagi penyimpanan data - data *booking* dalam bentuk kertas dikarenakan sudah tersimpan di dalam sistem yang telah dikembangkan.

ABSTRAK

Alghieshoot Photo Studio is a business or business engaged in photography. Based on the interviews that have been conducted, Alghieshoot Photo Studio requires the development of a system that is able to assist the administration process of processing income and expenses which still uses a manual method, which is recorded in a ledger so that this causes the preparation of income and expenditure reports for Alghieshoot's income not on time, Alghieshoot employees Photo Studio also has difficulty recording data because if the number of service transactions that occur is very large then the number of notes will also have a large number so it must be combined one by one based on the day/date and if there is a loss of notes it will make the quality of the report information not good and inaccurate, in ordering photography services is still manual, that is, customers must come to Alghieshoot Photo Studio. This is an opportunity for researchers to add a feature for booking photography services online to help in the process of ordering photography services to make it easier and more efficient. From the problems above, the researcher built an administrative information system for photography services that helps the administrative process of processing income and expenditure data so that making Alghieshoot Photo Studio income and expenditure reports becomes easy, timely and accurate when needed by the head or studio owner, as well as assist employees in processing transaction data if the number of service order transactions that occur is very large in the daily period, and no longer requires data storage - booking data in paper form because it is already stored in the system that has been developed.
