In this thesis, the researcher discusses about word formation process in the mass media which is magazine by using word formation that appears in the online *Men's Health Magazine*. This case concern towards two aspects which are sport and wellness.

This study aims to analyze and explain the process of word formation that occurs in the *Men's Health Magazine* by applying Yule's theory. The research was designed as a descriptive qualitative research. The sample of this research was sport and wellness terms found in eight articles in *Men's Health Magazine* published on November 2021. There were 10 types of word formation by Yule (2010).

The result of this study showed, there are 49 data of *compounding*, 39 data of *derivation*, 9 data of *abbreviation*, one datum of *borrowing*, and one datum of *clipping*. Therefore, it can be concluded that there are five of ten types of word formations in the articles. Furthermore, there is no *coinage*, *blending*, *conversion*, *backformation*, and *multiple processes* found in the articles.

Key words: Magazine, Sport and Wellness Term, and Word Formation.
